BET 2000

BET 2000

SELF SERVICE KIOSK FOR BETTING ROOM

- BET 2000 is a self service kiosk for betting rooms

- It automates user cash payment and prints a virtual wallet voucher that user will spend at game tables

- It also pays back the user balance after wins by scanning the win ticket barcode and retracting the same while endorsing the ticket as paid

- The kiosk also print receipts

- Manages both banknotes and coins

- User interaction is via a small high resolution touchscreen

- Modern Websocket APIs ease the integration of HTML5 or PHP application

BET 2000 is simple but nice to look and user friendly automatic teller machine for betting rooms.

The house personnel will be freed by most money handling and repetitive tasks thus focusing on customers.

The kiosk is designed with special focus on betting room needs including the special requirements for paying wins that including handling and retaining win receipts that must be physically endorsed.

APIs will take care of all the low level hardware management including error situation handling and the betting house software team can focus on the user interface writing software in high level web oriented languages.
