**ROTOTYPE**

Designed and Manufactured in Italy

IPK 1000 is a self service kiosk for **document processing**.

In addition to the typical functions of an informational Banking kiosk (checking account, online Banking functionalities) it features **A4 duplex scanner and A4 duplex laser printer**: it can therefore be used for depositing documents and modules (such as tax modules, money transfer orders, signed authorization documents, etc.) and for printing informational documents such as a list of operations or complete account operation log.

Scanned documents can be retained inside the kiosk in a high capacity tray or returned to the customer.

Certified components for Banking applications differentiate this kiosk that can be used with Banking cards for payments and other financial functions.
